November 4, 2002

MEMORANDUM FOR SECRETARIES OF THE MILITARY DEPARTMENTS  
ASSISTANT DEPUTY UNDER SECRETARY OF  
DEFENSE (TRANSPORTATION POLICY)

SUBJECT: Transportation Coordinators'-Automated Information for Movement  
System II (TC-AIMS II) Acquisition Decision Memorandum (ADM)

I approve Milestone III for Block 1 of TC-AIMS II. Taken in conjunction with the TC-AIMS II ADM of August 6, 2002, this ADM authorizes full deployment of Block 1 to all Army and Navy (excluding the Marine Corps) units. This ADM also directs the following:

- Within thirty (30) days from this date:
  - The Military Departments (MILDEPS) will provide the C3I OIPT Leader funding charts that reflect the MILDEPS' POM 2004 funding for TC-AIMS II. This information will be endorsed by the MILDEPS' budget office.
  - The Joint Program Management Office will provide the C3I OIPT Leader funding charts that reflect the TC-AIMS II POM 2004 numbers. This information will be endorsed by the Army budget office.
- The ADUSD (TP) will provide its analysis of the Air Force and Marine Corps TC-AIMS II white papers to the Joint Staff. Based on this analysis, and other operational factors, the Joint Staff will address the issue of joint interoperability and determine whether the use of TC-AIMS II as identified in CJCSI 3020.01 remains applicable. If required, budgetary action will be taken to support resolution of the joint interoperability issue.
- USJFCOM, in partnership with the ADUSD (TP), USTRANSCOM, and Joint Staff, will aggressively define the "to be" joint deployment process to include Key Performance Indicators (measurements) and business process reengineering based on Combatant Commanders' operational requirements. Once the "to be" joint deployment process is defined, ADUSD (TP) will develop and implement an Analysis of Alternatives as described in the ADM of August 6, 2002.

- The TC-AIMS II Joint Program Manager shall:
  - Resolve the TC AIMS II Block 1 requirement Test Incident Reports during Block 2 development.
  - Update the TC AIMS II Test and Evaluation Master Plan (TEMP) to support Block 2 testing and evaluation.
  - Update TC-AIMS II C4ISP within 90 days to address the critical and substantive comments raised during Stage I review.
  - Brief the Financial Management Modernization Program Office on the execution path for post-Block 2 activities within 60 days of the conclusion of the Analysis of Alternatives.
  - Ensure that a preparatory period of functional operations, to include extended training of users and incorporation of changes in existing business processes, is conducted at each Army installation as fielding proceeds.

The actions and conditions stipulated in the ADM of August 6, 2002, remain operative until completed.

As the DoD Chief Information Officer (CIO), and based on the information and documentation submitted by the Program Manager, and confirmed by the Army CIO, I determine that:

- The system is being developed in accordance with the requirements of Division E of the Clinger-Cohen Act of 1996 (40 U.S.C. 1401 *et seq.*);
- Appropriate actions have been taken in the areas of business process reengineering, analysis of alternatives, economic analysis, and performance measures, and
- The system has an appropriate information assurance strategy in place.

As subsequent blocks of TC-AIMS II functionality are developed, appropriate actions will be taken to ensure continued compliance with the Clinger Cohen Act.

  
John P. Stenbit
